

MapCreating

Creating a map with advanced functionality

[Create map](#)

Region

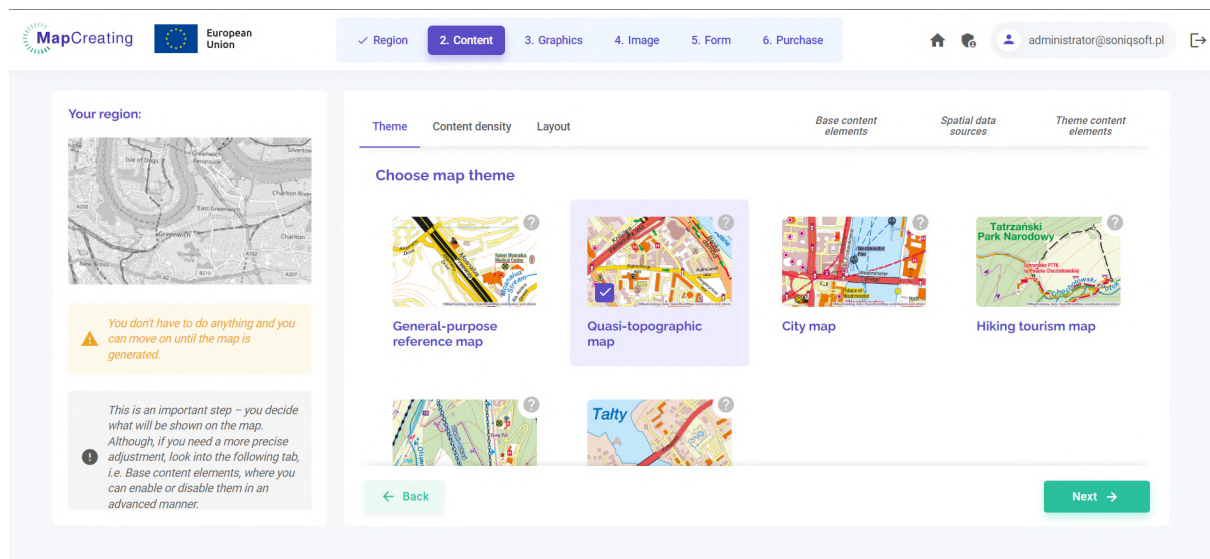

In this tab, it is possible to manually select the map extent and all other details related to it, i.e. selecting the appropriate scale, paper size and legend position.

The screenshot displays the 'MapCreating' application interface, specifically the 'Region' tab. The top navigation bar includes the 'MapCreating' logo, the European Union flag, and a series of tabs: '1. Region', '2. Content', '3. Graphics', '4. Image', '5. Form', and '6. Purchase'. The 'Region' tab is currently active. The main map area shows a street map of Greenwich, with a blue selection box highlighting a specific region. A scale bar at the bottom left indicates distances up to 2 km. The right-hand panel contains various settings for the map sheet, including 'Sheet settings', 'Set by name', 'Set by coordinates', and 'Set by file'. The 'Set by coordinates' section is expanded, showing fields for 'Geographic latitude' and 'Geographic longitude'. Below this, the 'Select the scale of the sheet' section is visible, with a dropdown menu set to '1: 15 000'. Further down, the 'Real data of the area' section provides information about the map's dimensions and area, including 'Area width: ~ 5.8 km / 3.6 mi' and 'Area height: ~ 3.5 km / 2.2 mi'. The 'Legend position' section is also visible, with options for 'left', 'down', and 'no legend'. The 'Units of scale' is set to 'metric', and the 'Rotation of the map' is set to '0°'. A 'Next' button is located at the bottom right of the interface.

Content

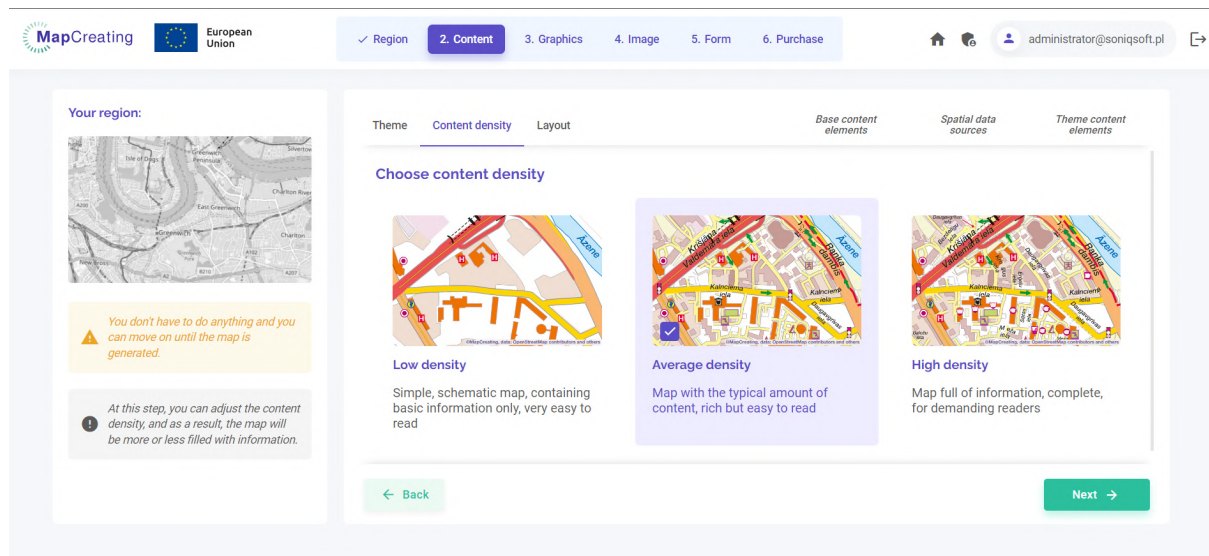

1. Theme

In this tab, the user can select a map topic, which affects the map's theme as well as the information and elements contained in it.

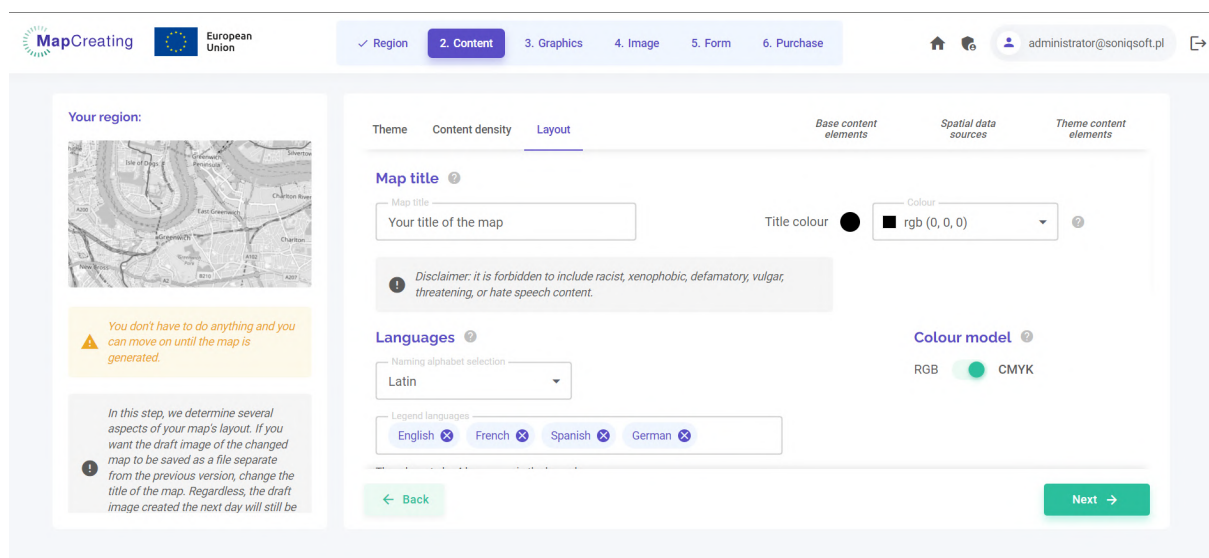

2. Content density

In this tab you can choose how many elements should be on the map.

3. Layout

In this tab, the user can choose from several values, such as changing the wording and color of the map title, selecting the alphabet and legend languages, changing the color model, adding a custom logo that will be added to the map, and changing the brightness or map grid.

Your region:

 You don't have to do anything and you can move on until the map is generated.

 In this step, we determine several aspects of your map's layout. If you want the draft image of the changed map to be saved as a file separate from the previous version, change the title of the map. Regardless, the draft image created the next day will still be

There have to be 4 languages in the legend

Logo

 You can upload your logo or, for example, one from your customer's Brand Book. Acceptable saving formats are tiff, png, or jpg. Please remember for the logo to have a high resolution; 400 pixels may not be enough; the bigger the map, the bigger the logo will be. Please make sure that the CMYK colour is composed of two components only; when there are 3 or 4, the colour may be slightly faded.

5. Spatial data sources (advanced tab)

The tab belongs to advanced settings. It is possible to select a background database other than OpenStreetMap®.

The screenshot displays the '2. Content' tab in the MapCreating application. The interface includes a top navigation bar with tabs for 'Region', '2. Content', '3. Graphics', '4. Image', '5. Form', and '6. Purchase'. The '2. Content' tab is active. On the left, a 'Your region:' section shows a map of a river area with a warning message: 'You don't have to do anything and you can move on until the map is generated.' Below this is a note: 'Note! This is an advanced settings tab. Instead of OpenStreetMap®, you can choose the Local Official Topographic Database as the map base.' The main content area is titled 'OpenStreetMap® contributors' and features three map thumbnails: 'city map in 1:20,000 scale', 'map of the village in 1:20,000 scale', and 'map of sparsely inhabited area in 1:20,000 scale'. Below these, there is a section for 'GUGIK BDOT10k' with three more map thumbnails. The interface also includes a 'Theme' tab, 'Content density', and 'Layout' options. At the bottom, there are 'Back' and 'Next' buttons.

Analysis of the map's draft image

Your title of the map

 The map's draft image has been made as desired, it has a draft resolution and includes a watermark.

Carefully verify the map using a magnifying glass. The image was generated automatically, so despite our efforts, the map may contain technical and substantive flaws unacceptable to you. Moreover, even though the editors completing the source data work around the world, there are still many white spots, so verify whether the information is complete for your region.

We emphasise – we do not want you to pay for a map that does not meet your expectations. However, we can't see your map, so you're the only one who can tell if it's good.

⚠ We currently provide a printed map for selected countries only. ▾

Your region:

Map file Printed map

The maximum number of printed maps is 20 pcs.

1 In the case of printing a wall-mounted map, we strongly recommend film coating, usually double-sided. It strengthens and protects the paper and makes the map colours more vivid.

1 The sum of 3 dimensions of a regularly finished map – the depth is 20 cm, it can reach a maximum of 2.8 m, for logistical reasons. Nevertheless, if you require a larger map, please contact us. However, transport can be very expensive.

1 If you want to print more than 50 copies, we recommend offset printing, because printing a custom map as well as regular one is then cheaper – contact us please.
